

PCN Intelligence URL Cutover

How to Update Bookmarks & Scripts

Updating Web Browser Bookmarks

Step 1: Open your current bookmark

Step 2: Right-click, select to edit bookmark or address

Step 3: Enter the new URL: PCNI.PARTS.ACCURISTECH.COM

Step 4: Save changes

Tip: Check any saved shortcuts on your desktop or browser home screen.

Updating Email Rules or Filters

If you use email rules or filters that reference the old domain:

Step 1: Go to your email settings or rules/filters panel

Step 2: Search for rules that include PCNI.PDD.IHS.COM

Step 3: Replace with the new domain: PCNI.PARTS.ACCURISTECH.COM

Step 4: Test by sending a sample notification to verify the rule still works

Updating Scripts or Automated Tools

For teams using scripts, internal tools, or automation, find and replace any references to the old URL.

Example (before): url = https://pcni.pdd.ihs.com/api/data

Example (after): url = https://pcni.parts.accuristech.com/api/data

Reminders:

- Most customers using automation rely on FTP access and may not need changes.
- Confirm with your development or IT team to ensure continuity.
