# ACCURIS

Parts Content Services

Drive complete product reporting using services to obtain reliable content for all your electronic parts.

Parts Content Services: Tailored Data for Complete Supply Chain Visibility

Expertly modeled and obtained data to help organizations manage supply chain risks, ensure compliance, and accelerate product development with customizable solutions that deliver actionable insights.

1. Confidently navigate the regulatory landscape and reduce material compliance risks.

2. Mitigate supply chain disruptions and ensure continuity.

3. Minimize the impact of sanctions, tariffs, and trade rules with informed part selection.

4. Cover all electronic parts, including those not in the Accuris Parts Library.

5. Extract and transform detailed part content for use in your enterprise applications.

ACCURIS

Strategic Features & Business Benefits

Expertly Modeled & Obtained Content

In-depth research and analysis, sourcing critical data directly from manufacturers and other reliable sources.

Existing Parts Library

Leverage a library of over 1.2 billion parts enriched with lifecycle updates, technical specifications, environmental compliance data, and export regulation support.

Customizable Solutions

Tailor services to specific needs, whether for a single project or long-term integration.

Seamless Integration

Seamlessly integrate our content into your existing systems, including PLM, Material Compliance, ERP, and CAD tools.

Material Compliance & Visibility

Stay informed on regulatory changes to ensure compliance with standards like RoHS, REACH, conflict minerals, CA Prop 65, EU POPs, SCIP, and PFAS. Access Full Material Disclosures to prepare for future chemical regulations.

Improved Product Development

Accelerate time-to-market by obtaining complete, accurate, and current part information.

Enhanced Decision-Making

Deliver critical component data to BOM Intelligence or existing applications using content services capabilities for improved visibility and decision-making.

Advanced Reporting

Generate compliance reports and track supply chain risks with minimal effort.

Gaining a Data Advantage: How Parts Content Services Work

Parts Content Services combines our extensive library with expert-driven sourcing to deliver critical information, accelerating your product's lifecycle. Leveraging our in-house expertise, we efficiently gather component data, freeing your team to focus on core business objectives.

1.

Content Assessment

Collaboration to define specific needs and the scope of the project.

2.

Content Sourcing

Our team of experts locates the necessary custom data from reliable sources.

3.

Data Enrichment

We cleanse, verify, and enrich data to ensure accuracy and consistency.

4.

Content Delivery

We deliver the content in a format that easily integrates with your systems.

5.

Ongoing Support

Continuous support to ensure the latest data and address evolving needs.

"Accuris Parts Content Services has transformed how we manage component data and compliance. The seamless integration into our PLM system has saved us countless hours and significantly reduced errors."

– Design Engineer, Leading Electronics Manufacturer

ACCURIS

Tailored Solutions for Your Needs

Parts Content Services offers comprehensive solutions tailored to your business goals. From ensuring regulatory compliance to optimizing your supply chain, we provide the expert data and support you need to succeed.

Types of Projects	
Environmental Compliance	Services to obtain material compliance content to meet regulations such as RoHS, REACH, SCIP, and more. Cleanse and verify part master files, catalogs, and item information, minimizing administrative burdens. Identify compliant parts and replacements, standardize content, and ensure compatibility.
Export Compliance	Improve export compliance with tailored data aligned with international regulations and actionable insights for global trade. Analyze and process export compliance data to minimize risks and penalties.
Conflict Minerals	Manage conflict minerals compliance with the iPoint Conflict Minerals Platform (iPCMP). Collect, analyze, and report on conflict mineral data to meet customer needs and regulations with appropriate due diligence. Strengthen supply chain transparency and simplify reporting.
Lifecycle & Obsolescence	Track component lifecycle, plan for obsolescence, and identify suitable alternatives. Receive annual updates and detailed obsolescence reports for consistent monitoring. Mitigate redesign costs, ensure production continuity, and reduce risks from unplanned obsolescence.
Custom Content Services	Tailored solutions for unique requirements, including sourcing data not found in the Accuris Parts Library. Services include part cleansing, content extraction from datasheets or drawings, and preparation for specific use models like BOM Intelligence or compliance applications. Facilitate data availability, reduce costs, and power new workflows.

ACCURIS

Accelerate Your Projects With Packaged Services

Packaged Services offers a flexible and cost-effective way to access Accuris Parts Content Services quickly and efficiently, removing the need to create a detailed SOW. Instead, resources are available on demand. Choose from predefined subscription options based on the monthly hours needed, secure dedicated time with our team of experts, and receive the content you need faster.

1. Streamline operations and scale up your team without long-term commitments.

2. Get content faster without the lengthy process of custom service requests and SOWs.

3. Optimize content services spending with predefined subscription packages.

4. Improve decision-making and free your team to focus on core business activities.

Packaged Services can be used for:

ESG & Sustainability

Source environmental compliance data (e.g., RoHS, REACH, TSCA) and manage material declarations for your products.

Part Cleansing & Ad-hoc Needs

Improve data quality, enhance part coverage, and address unexpected content needs.

Near Supply Risk & Strategic Sourcing

Track component availability, pricing, and obsolescence to mitigate supply chain disruptions.

Process Optimization & Training

Scope-out training on regulations and best practices and streamline content management workflows.

ACCURIS

Achieve More with the Accuris Ecosystem

Accelerate innovation, streamline operations, and enhance strategic foresight with our Supply Chain Intelligence suite: an ecosystem of powerful tools designed to complement each other. Deliver exceptional value across your enterprise by combining Parts Content Services with the following solutions.

Parts API Integrations:
Seamless Data Access

Simplify workflows by gaining access to over 1.2 billion components. Integrate accurate and up-to-date part data into your PLM, ERP, and other enterprise systems to streamline design and sourcing decisions, ensuring efficient compliance management and proactive risk mitigation.

BOM Intelligence:
Data-Driven BOM Management

Simplify Bill of Materials (BOM) management with timely insights on the project level, advanced reporting, and the industry's largest electronic component library. Optimize costs, ensure regulatory compliance, and proactively mitigate risks to accelerate time to market.

Supply Chain Insights:
Proactive Risk Management

Gain critical insights into global supply chain dynamics by mapping components on Bill of Materials (BOM) to supplier manufacturing locations. Proactively manage risks, anticipate disruptions, and ensure operational continuity with up-to-date data and contingency planning.

PCN Intelligence:
Real-Time Change Monitoring

Stay ahead of potential disruptions with dedicated monitoring and by matching PCNs and EOLs to all parts across the organization, including custom and atypical components. Receive timely alerts and adapt quickly to maintain production while avoiding costly redesigns.

ACCURIS

Efficient Data Sourcing: How Our Customers Benefit

Engineering

Improve design efficiency, minimize errors and rework, and ensure compliance with access to accurate, standardized, curated component data.

Procurement

Reduce sourcing costs with precise pricing and availability insights, optimize inventory, and enhance supplier relationships.

Regulatory Compliance

Navigate the changing regulatory landscape to ensure compliance while reducing costs and penalties. Streamline audits and reporting to avoid delays.

Supply Chain

Mitigate supply chain risks, optimize inventory, and enhance supplier performance to ensure continuity and reduce costs.

Streamline your workflows with Accuris Parts Content Services.
